## CAREER GOAL

I'm a web developer using ReactJs and Nodejs, I can perform coding individually as well as in a team. Have experience working as a developer, and have experience working with a Scrum team. Passionate about usability, and reusable components and possess working knowledge of Figma, and Lighthouse optimizations. I am willing to learn new technologies and adapt to new challenges. I would like to be a software architect developer in the future.

## WORK EXPERIENCE

### TECHTRONIC INDUSTRIES

*web developer*

02/2023 - now

- TTI - Techtronic Industries is a global company and a world leader in growth in the fields of Power Tools, Accessories, Hand Tools, Outdoor Power Equipment, and Floor Care for customers in need. do it yourself (Do-It-Yourself),
- I work for the company as a web engineer, building a system to support engineers in converting machines used in industrial production when new products are available and managing machines, fixtures, tools, etc. Keep saving time for daily reports and, support for production and a platform for multiple teams in the factory to use to plan production following current equipment

#### Technologies used

- We use React, Typescript, Nodejs, Mysql, Github, Jira, and Windows server for product development.

#### Things achieved

- How to manage server build, optimize queries, command execution strategy, optimize code time, decentralization and system security, etc. Ability to communicate and work with end users, understand and solve their problems
- Here I also have seminars to share technology and new features for the team to discuss and find the optimal solutions for the products.

### CARP TECH CORPORATION

*Front-end Developer*

04/2022 - 2/2023

- Carp Tech is a startup in Vietnam specializing in software outsourcing and providing software solutions
- I work for the company as a web front-end engineer, I joined a project outsourcing for ACB bank a project for the vendor of ACB bank, and budget for the projects they want to rent to do. I analyze documents and develop application functions. The product that I specialize in is creating interfaces for login, vendor, system config, contract, project, import data, decentralizing users, fixing related bugs, building and deploying, and ensuring that all user input is validated before submitting it to the Back-end

#### Technologies used

- We use React, Javascript, C#, SQL Server, GitLab, Jira, and AWS for product development

**Things achieved:**

- How to use and optimize and custom library, how to organize a CRM project's source code, use custom hooks for looping logic, advanced git, custom react queries for caching and fetching, how is the system built, what is state management in a large project to use, how is client-side hierarchical, communicate between team members and how to raise problems and solve any problem. etc.

**IGAP**

*Front-end Developer*

02/2022 - 04/2022

- IGAP is a company providing comprehensive logistics solutions for manufacturing and business enterprises with two main products: digital transformation and operational services for transferring goods from warehouses to distribution systems.

- I joined the company as a front-end engineer specializing in creating interfaces for shipping orders, creating trips, splitting trips, and decentralizing users. I also have technology sessions here to improve performance and improve code quality

**Technologies used**

- We use React, Javascript, Java, Go, Mysql, Mongodb, Bitbucket, Slack, and Google Cloud for product development.

**Things achieved:**

- Approach to learning new technologies, how to ask questions, and solve problems

## TECHNICAL SKILL

**Programming Languages:**

Javascript, TypeScript, C#

*(I'm I haven't used NestJS for a while, but quite confident that I can catch up with other languages when needed very fast)*

**Web Front-end Technologies:**

React, HTML5, CSS3, Antd, Tailwind, Mui, SCSS, Webpack, Vitest

**Web Back-end Technologies:**

- Protocols: REST, HTTP(S)
- Frameworks/Libraries: Node.js, Express.js, NestJs
- Databases: Mysql, MongoDB

*(I haven't used NestJS for a while)*

**Tools:**

Git, Docker, Github, Gitlab, Jira, Figma, VS Code, Bash

**Soft skills:**

English reading, listening, speaking skill, positive attitude, observation and catch up quickly, ability to work in groups, listening and learning critiques, mentor new members.

## STUDIES

- HCM UNIVERSITY OF INDUSTRY AND TRADE

*Major: Information system*

08/2019 - 08/2023

- **Gpa:** 3.12/4

- **CYBERSOFT**

*Major: Front-end web*

03/2021 - 11/2021

- **Score:** 90/100

## HONORS & AWARDS

---

End of term scholarship

2019,2020

2nd place in the talent and creative product competition of university

2021

## LANGUAGES

---

- **English :** Read and understand specialized documents. Good communication
